Control of Spatially Structured Random Processes and Random Fields with Applications (Nonconvex Optimization and Its Applications) Ruslan K. Chornei, Hans Daduna, Pavel S. Knopov

This book is devoted to the study and optimization of spatiotemporal stochastic processes - processes which develop simultaneously in space and time under random influences. These processes are seen to occur almost everywhere when studying the global behavior of complex systems. The book presents problems and content not considered in other books on controlled Markov processes, especially regarding controlled Markov fields on graphs.
