Foundations of Computational Linguistics: Human-Computer Communication in Natural Language
Roland Hausser

The central task of a future-oriented computational linguistics is the development of cognitive machines which humans can freely talk with in their respective natural language. In the long run, this task will ensure the development of a functional theory of language, an objective method of verification,and a wide range of practical applications.

Natural communication requires not only verbal processing, but also non-verbal perception and action. Therefore the content of this textbook is organized as a theory of language for the construction of talking robots. The main topic is the mechanism of natural language communication in both the speaker and the hearer. The book contains more than 700 exercises for reviewing key ideas and important problems.

In the 2nd edition, Chapters 22-24 have been completely rewritten. They present a declarative outline for programming the semantic and pragmatic interpretation of natural language communication.

From reader reviews:

Terry Holmes:

Reading a publication tends to be new life style in this particular era globalization. With reading you can get a lot of information that may give you benefit in your life. With book everyone in this world may share their idea. Books can also inspire a lot of people. Lots of author can inspire their reader with their story as well as their experience. Not only the storyline that share in the books. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors these days always try to improve their proficiency in writing, they also doing some analysis before they write on their book. One of them is this Foundations of Computational Linguistics: Human-Computer Communication in Natural Language.

David Bergeron:

Often the book Foundations of Computational Linguistics: Human-Computer Communication in Natural Language has a lot details on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. The author makes some research previous to write this book. This kind of book very easy to read you may get the point easily after scanning this book.

Edward Salazar:

Your reading 6th sense will not betray anyone, why because this Foundations of Computational Linguistics: Human-Computer Communication in Natural Language reserve written by well-known writer who really knows well how to make book which can be understand by anyone who also read the book. Written with good manner for you, still dripping wet every ideas and creating skill only for eliminate your current hunger then you still skepticism Foundations of Computational Linguistics: Human-Computer Communication in Natural Language as good book not only by the cover but also through the content. This is one book that can break don't determine book by its cover, so do you still needing another sixth sense to pick that!? Oh come on your studying sixth sense already alerted you so why you have to listening to a different sixth sense.

Delilah Jordan:

In this age globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. Often the book that recommended for your requirements is Foundations of Computational Linguistics: Human-Computer Communication in Natural Language this publication consist a lot of the information in the condition of this world now. This specific book was represented how does the world has grown up. The words styles that writer require to explain it is easy to understand. Often the writer made some study when he makes this book. That's why this book ideal all of you.
