## German Sentence Processing (Studies in Theoretical Psycholinguistics)

The German language offers a variety of possibilities for asking and answering new questions in psycholinguistic sentence comprehension research. The collection of papers in this volume contributes to the increasingly relevant crosslinguistic comparison of mechanisms of human sentence processing. The topics covered are incremental structure assembly, on-line ambiguity resolution, and phonological, contextual, and working memory aspects of reanalysis.

The new theoretical and experimental insights presented in this volume should be of great interest to linguists and psychologists working on human language comprehension. The introductory information provided by the authors makes the volume easily accessible to advanced students.
