Methods for Measuring Greenhouse Gas Balances and Evaluating Migration Options in Smallholder Agriculture

Methods for Measuring Greenhouse Gas Balances and Evaluating Migration Options in Smallholder Agriculture

This book provides standards and guidelines for quantifying greenhouse gas emissions and removals in smallholder agricultural systems and comparing options for climate change mitigation based on emission reductions and livelihood trade-offs. Globally, agriculture is directly responsible for about 11% of annual greenhouse gas (GHG) emissions and induces an additional 17% through land use change, mostly in developing countries. Farms in the developing countries of sub-Saharan Africa and Asia are predominately managed by smallholders, with 80% of land holdings smaller than ten hectares. However, little to no information exists on greenhouse gas emissions and mitigation potentials in smallholder agriculture. Greenhouse gas measurements in agriculture are expensive, time consuming, and error prone, challenges only exacerbated by the heterogeneity of smallholder systems and landscapes. Concerns over methodological rigor, measurement costs, and the diversity of approaches, coupled with the demand for robust information suggest it is germane for the scientific community to establish standards of measurements for quantifying GHG emissions from smallholder agriculture. Standard guidelines for use by scientists, development organizations will help generate reliable data on emissions baselines and allow rigorous comparisons of mitigation options. The guidelines described in this book, developed by the CGIAR Research Program on Climate Change, Agriculture, and Food Security (CCAFS) and partners, are intended to inform anyone conducting field measurements of agricultural greenhouse gas sources and sinks, especially to develop IPCC Tier 2 emission factors or to compare mitigation options in smallholder systems.

From reader reviews:

Willie Hodges:

Nowadays reading books are more than want or need but also work as a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The data you get based on what kind of book you read, if you want send more knowledge just go with knowledge books but if you want truly feel happy read one with theme for entertaining such as comic or novel. Typically the Methods for Measuring Greenhouse Gas Balances and Evaluating Migration Options in Smallholder Agriculture is kind of publication which is giving the reader unforeseen experience.

Diana Castillo:

This book untitled Methods for Measuring Greenhouse Gas Balances and Evaluating Migration Options in Smallholder Agriculture to be one of several books this best seller in this year, that is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this specific book in the book retailer or you can order it by using online. The publisher in this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smart phone. So there is no reason to you personally to past this reserve from your list.

Theresa Villarreal:

Reading a book to get new life style in this yr; every people loves to study a book. When you study a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, this kind of us novel, comics, in addition to soon. The Methods for Measuring Greenhouse Gas Balances and Evaluating Migration Options in Smallholder Agriculture will give you a new experience in looking at a book.

Jeff Cunningham:

What is your hobby? Have you heard that will question when you got scholars? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And also you know that little person like reading or as examining become their hobby. You need to understand that reading is very important as well as book as to be the factor. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You see good news or update about something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is Methods for Measuring Greenhouse Gas Balances and Evaluating Migration Options in Smallholder Agriculture.
