Introduction to Linear Circuit Analysis and Modelling: From DC to RF

Luis Moura, Izzat Darwazeh

Introduction to Linear Circuit Analysis and Modelling: From DC to RF Luis Moura, Izzat Darwazeh
Luis Moura and Izzat Darwazeh introduce linear circuit modelling and analysis applied to both electrical and electronic circuits, starting with DC and progressing up to RF, considering noise analysis along the way.

Avoiding the tendency of current textbooks to focus either on the basic electrical circuit analysis theory (DC and low frequency AC frequency range), on RF circuit analysis theory, or on noise analysis, the authors combine these subjects into the one volume to provide a comprehensive set of the main techniques for the analysis of electric circuits in these areas.

Taking the subject from a modelling angle, this text brings together the most common and traditional circuit analysis techniques (e.g. phasor analysis) with system and signal theory (e.g. the concept of system and transfer function), so students can apply the theory for analysis, as well as modelling of noise, in a broad range of electronic circuits.

A highly student-focused text, each chapter contains exercises, worked examples and end of chapter problems, with an additional glossary and bibliography for reference. A balance between concepts and applications is maintained throughout.

The book is also supported by a companion website, featuring a full solutions manual, additional equations, graphs and illustrations for Lecturers to download when preparing teaching aids, as well as numerous case studies, worked examples and exercises using MATLAB to aid student learning.

Luis Moura is a Lecturer in Electronics at the University of Algarve. Izzat Darwazeh is Senior Lecturer in Telecommunications at University College, London, previously at UMIST.

- An innovative approach fully integrates the topics of electrical and RF circuits, and noise analysis, with circuit modelling
- Highly student-focused, the text includes exercises and worked examples throughout, along with end of chapter problems to put theory into practice
- The companion website for the book features additional exercises and a full solutions manual to aid student learning

From reader reviews:

Robert Russo:

Typically the book Introduction to Linear Circuit Analysis and Modelling: From DC to RF has a lot details on it. So when you read this book you can get a lot of gain. The book was published by the very famous author. The author makes some research ahead of write this book. That book very easy to read you may get the point easily after reading this article book.

Joseph Kidwell:

Playing with family in the park, coming to see the sea world or hanging out with pals is thing that usually you have done when you have spare time, subsequently why you don't try issue that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Introduction to Linear Circuit Analysis and Modelling: From DC to RF, you may enjoy both. It is excellent combination right, you still want to miss it? What kind of hang type is it? Oh can occur its mind hangout guys. What? Still don't understand it, oh come on its known as reading friends.

Rhonda Rudder:

Don't be worry when you are afraid that this book may filled the space in your house, you could have it in e-book way, more simple and reachable. This specific Introduction to Linear Circuit Analysis and Modelling: From DC to RF can give you a lot of friends because by you looking at this one book you have matter that they don't and make a person more like an interesting person. This particular book can be one of a step for you to get success. This e-book offer you information that maybe your friend doesn't understand, by knowing more than some other make you to be great persons. So , why hesitate? We need to have Introduction to Linear Circuit Analysis and Modelling: From DC to RF.

Lawrence Caulfield:

What is your hobby? Have you heard that question when you got college students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person like reading or as studying become their hobby. You need to know that reading is very important along with book as to be the thing. Book is important thing to provide you knowledge, except your current teacher or lecturer. You discover good news or update with regards to something by book. A substantial number of sorts of books that can you decide to try be your object. One of them are these claims Introduction to Linear Circuit Analysis and Modelling: From DC to RF.
