The Red Tide: Stalin Strikes First (World War Three 1946) Harry Kellogg

World War Three 1946--Book One--The Red Tide--Stalin Strikes First Illustrated, Revised and Annotated Edition. An almost total rewrite, including end notes that assist the reader down the path of a convincing, alternate history. An alternate history based on facts and logic.

* On the border of West Germany; Stalin has 60 mechanized divisions, composed of the battle hardened veterans.

* The US and Britain have demobilized their armies.

* Britain is bankrupt and rationing bread. Its empire is crumbling and its colonies are in revolt.

* Tens of thousands of USAAF and RAF planes have been dumped into the ocean, pushed into piles, crushed and left rotting in jungles around the world.

* The US has entered a period of isolationism.

* The people of Europe are starving.

* The Germans are being brutally punished for their part in the war.

* The Soviet Union has acquired the major secrets of every strategic weapons system that the West has developed since 1935, including the atomic bomb. They have prototypes of every major German Wonder Weapon system produced since 1943.

* Greece, Italy and even France are in danger of turning Communist.

* 90% of the industry in the US and Britain has been transformed from producing weapons, to consumer goods.

* Europe is in chaos and Capitalism has failed in the eyes of many.

These are facts, and this was the state of the world in May 1946.

This alternate history proposes that this was the opportune time for Stalin to strike. This was his best chance of furthering the cause of Communism. This was his moment.

The Red Tide is the first in this series of fictional books. Alternate history explores the great "what ifs" of time. This is one of those great what ifs.

The ribbons of time start to unravel and diverge from ours in 1943. Slowly at first and then faster and faster until a fateful day in May 1946. The Soviets have stopped the production of the US atomic bomb by incapacitating the majority of the American program's scientists and have at the same time destroyed the entire existing supply of polonium. This systematic crippling of the US atomic program convinces Stalin that the time is right to strike.

We were able to obtain copies of many of the actual post war strategic plans of the US Joint Chiefs of Staff. Many of the strategies proposed in these works, were developed from these actual plans, and would have been in effect for much of the 1946-1948 era.

What if German designed jet fighters, jet bombers, rocket powered interceptors, super tanks, undetectable submarines, guided air to air and ground to air missiles were all in the hands of Joseph Stalin. The Wasserfal and the X4 missiles will sweep the skies clear. The Me 262, Me 163, He 162 and the AR 234 along with the Mig 9 and Yak 15 will duel with the Meteor and Shooting Star.

Over 750,000 hits on the AlternativeHistory.com website with comments like these:

The Vulture: "Damn, the Russians are already getting into France? That's one hell of an advance. Keep it up, man! This is great storytelling. You're really building a lot of suspense here."

Saxon Dog: "Good job. Very plausible. I've done a bunch of research on this myself and you aren't far off my own conclusions at all. "

The Red: "Brilliant stuff, it's not often you get a "WW3 in 1945/6" TL with the Soviets actually winning. It's as grim as I imagined.

Sachistao: "Holy hell. This is gripping."

Mario Rossi: "Chapter after chapter, the story becomes more intriguing ... Keep it up!"

ScottBoySwa: "Amazing! I have enjoyed this immensely! I eagerly await the updates, keep em' coming!"
