Recent state-of-the-art technologies in fabricating low-loss optical and mechanical components have significantly motivated the study of quantum-limited measurements with optomechanical devices. Such research is the main subject of this thesis. In the first part, the author considers various approaches for surpassing the standard quantum limit for force measurements. In the second part, the author proposes different experimental protocols for using optomechanical interactions to explore quantum behaviors of macroscopic mechanical objects. Even though this thesis mostly focuses on large-scale laser interferometer gravitational-wave detectors and related experiments, the general approaches apply equally well for studying small-scale optomechanical devices.

The author is the winner of the 2010 Thesis prize awarded by the Gravitational Wave International Committee.

### **From reader reviews:**

#### **Megan Martelli:**

Book is to be different for each grade. Book for children right up until adult are different content. We all know that that book is very important for people. The book Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) was making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The publication Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) is not only giving you far more new information but also to be your friend when you feel bored. You can spend your spend time to read your reserve. Try to make relationship with the book Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses). You never sense lose out for everything if you read some books.

#### **Lorna Dews:**

This Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) book is not really ordinary book, you have it then the world is in your hands. The benefit you have by reading this book will be information inside this e-book incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This particular Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) without we recognize teach the one who reading through it become critical in pondering and analyzing. Don't become worry Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) can bring when you are and not make your case space or bookshelves' turn out to be full because you can have it in your lovely laptop even mobile phone. This Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) having fine arrangement in word as well as layout, so you will not feel uninterested in reading.

#### **Melissa Broussard:**

Nowadays reading books be a little more than want or need but also work as a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The information you get based on what kind of e-book you read, if you want get more knowledge just go with schooling books but if you want really feel happy read one along with theme for entertaining including comic or novel. Typically the Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) is kind of publication which is giving the reader capricious experience.

#### **Bruce Hensley:**

Precisely why? Because this Exploring Macroscopic Quantum Mechanics in Optomechanical Devices (Springer Theses) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will jolt you with the secret that inside. Reading this book alongside it was fantastic author who else write the book in such wonderful way makes the content within easier to understand, entertaining means but still

convey the meaning fully. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of advantages than the other book have such as help improving your ability and your critical thinking method. So , still want to postpone having that book? If I were you I will go to the book store hurriedly.
