### **[FREE Resource Guide bonus inside!]**

If you are looking into publishing your own music online, whether to simply share it or to make money from it, then this book is for YOU.

We are going to go over the basics of music publishing, including recent developments in the field of online publishing.

Over the past two decades there has been a dramatic change regarding how the music industry functions. Twenty years ago, the internet couldn't be accessed by the public. To get acts signed to one of the major record labels was the only option and the purchase of music was limited to vinyl records and audio tapes, as there were no audio discs (CDs) around at that time. The major record labels, which include Universal, Sony and Warner Music, were the dominants of the music industry.

In this book, I will consider how social media and websites such as Kickstarter, Soundcloud, BBC Introducing, and Band Camp have totally re-invented web-based publishing and made it easier for unsigned acts and artists to establish themselves online.

I will explore what motivates music artists to publish online and explain the different tools and techniques for independent online music distribution and promotion. Furthermore, I will also explain the future of online music publishing in whatever methods people will use to get their tracks and merchandise out in the public arena.

Once you purchase this book, you will have access to a web link to the FREE Resource Guide that

accompanies the book--full of resources that will help you to prepare for your music publishing career.

Ready to start publishing your own music online? Then **CLICK THE BUY BUTTON**, start reading and get yourself in position to publish your music for the world to hear!
