Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics)

Rudolf Fritsch, Renzo Piccinini

Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) Rudolf Fritsch, Renzo Piccinini

This book describes the construction and the properties of CW-complexes. These spaces are important because firstly they are the correct framework for homotopy theory, and secondly most spaces that arise in pure mathematics are of this type. The authors discuss the foundations and also developments, for example, the theory of finite CW-complexes, CW-complexes in relation to the theory of fibrations, and Milnor's work on spaces of the type of CW-complexes. They establish very clearly the relationship between CW-complexes and the theory of simplicial complexes, which is developed in great detail. Exercises are provided throughout the book; some are straightforward, others extend the text in a non-trivial way. For the latter; further reference is given for their solution. Each chapter ends with a section sketching the historical development. An appendix gives basic results from topology, homology and homotopy theory. These features will aid graduate students, who can use the work as a course text. As a contemporary reference work it will be essential reading for the more specialized workers in algebraic topology and homotopy theory.

From reader reviews:

Lacey Clements:

This book entitled Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) to be one of several books in which best seller in this year, that's because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this specific book in the book retail store or you can order it by means of online. The publisher on this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Mobile phone. So there is no reason for you to past this guide from your list.

Colleen Holden:

People live in this new morning of lifestyle always try and and must have the free time or they will get lots of stress from both lifestyle and work. So , once we ask do people have time, we will say absolutely yes. People is human not really a huge robot. Then we inquire again, what kind of activity are there when the spare time coming to you of course your answer will unlimited right. Then ever try this one, reading books. It can be your alternative with spending your spare time, the particular book you have read is usually Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics).

Jose Scott:

You could spend your free time to learn this book this reserve. This Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) is simple to develop you can read it in the area, in the beach, train and soon. If you did not have much space to bring often the printed book, you can buy typically the e-book. It is make you better to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Aida Zambrana:

That reserve can make you to feel relax. This kind of book Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) was colourful and of course has pictures on the website. As we know that book Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) has many kinds or category. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and think that you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.
