Information and Exponential Families in Statistical Theory (Wiley Series in Probability and Statistics)

O. Barndorff-Nielsen

First published by Wiley in 1978, this book is being re-issued with a new Preface by the author. The roots of the book lie in the writings of RA Fisher both as concerns results and the general stance to statistical science, and this stance was the determining factor in the author's selection of topics. His treatise brings together results on aspects of statistical information, notably concerning likelihood functions, plausibility functions, ancillarity, and sufficiency, and on exponential families of probability distributions.

From reader reviews:

Troy Jones:

Reading a book can be one of a lot of task that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a guide will give you a lot of new facts. When you read a e-book you will get new information due to the fact book is one of various ways to share the information or even their idea. Second, studying a book will make anyone more imaginative. When you studying a book especially fiction book the author will bring that you imagine the story how the people do it anything. Third, you can share your knowledge to other folks. When you read this Information and Exponential Families in Statistical Theory (Wiley Series in Probability and Statistics), you are able to tells your family, friends as well as soon about yours book. Your knowledge can inspire different ones, make them reading a guide.

Lizabeth Melgar:

Is it you actually who having spare time after that spend it whole day by simply watching television programs or just resting on the bed? Do you need something totally new? This Information and Exponential Families in Statistical Theory (Wiley Series in Probability and Statistics) can be the answer, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these publications have than the others?

Lena Lewis:

What is your hobby? Have you heard in which question when you got learners? We believe that that problem was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person such as reading or as examining become their hobby. You should know that reading is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Many kinds of books that can you go onto be your object. One of them is niagra Information and Exponential Families in Statistical Theory (Wiley Series in Probability and Statistics).

Anita Sizemore:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information from your book. Book is composed or printed or highlighted from each source this filled update of news. On this modern era like today, many ways to get information are available for an individual. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the Information and Exponential Families in Statistical Theory (Wiley Series in Probability and Statistics) when you necessary it?
