Multivariable Calculus, Linear Algebra and Differential Equations

Stanley I. Grossman

Multivariable Calculus, Linear Algebra and Differential Equations Stanley I. Grossman

The third edition combines coverage of multivariable calculus with linear algebra and differential equations. Grossman's unique approach provides maths, engineering, and physical science students with a continuity of level and style. The intuitive approach is stressed over a more rigorous/formal treatment of the topics. An abundance of examples, graded exercises, and numerous applications all contribute to student appeal. Features: * Historical notes and biographical sketches describe the development of an idea or identify an important person in mathematics. * Graphs and exercises sets are incorporated throughout the text to help students visualize mathematics and better understand concepts. * An optional discussion of Newton's method for two variables is part of Section 3.12. * The Summing Up Theorem is used to tie together seemingly disparate topics in the study of linear algebra. * Section 10.3 contains an answer to the question "When is a differential equation separable ?" * Numerous examples throughout the text contain all the algebraic steps needed to complete the solution. * The text contains over 5,500 exercises graded according to difficulty, and there is a balance between technique and proof. New to this edition: * Solving Linear Systems Numerically: Gaussian Elimination with Divoting has been added to Chapter 6. * Coverage of Least Squares Approximation and Isomorphisms has been added to Chapter 8. * True/False and multiple choice "Self-Quiz" exercises now begin each problem set. Students can use these exercises to assess their comprehension before tackling the exercise set. * Each chapter now ends with a review of the important results of that chapter. * Examples and figures are now titled so that students can easily grasp the essential concept each one illustrates.

From reader reviews:

Michael Colburn:

Have you spare time for a day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a go walking, shopping, or went to the actual Mall. How about open or maybe read a book allowed Multivariable Calculus, Linear Algebra and Differential Equations? Maybe it is to become best activity for you. You recognize beside you can spend your time using your favorite's book, you can better than before. Do you agree with it has the opinion or you have some other opinion?

Mary Mohammad:

Now a day individuals who Living in the era where everything reachable by connect to the internet and the resources in it can be true or not involve people to be aware of each information they get. How people have to be smart in having any information nowadays? Of course the answer is reading a book. Reading through a book can help people out of this uncertainty Information particularly this Multivariable Calculus, Linear Algebra and Differential Equations book since this book offers you rich information and knowledge. Of course the info in this book hundred per-cent guarantees there is no doubt in it everybody knows.

Penny Laughlin:

Hey guys, do you desires to finds a new book to read? May be the book with the concept Multivariable Calculus, Linear Algebra and Differential Equations suitable to you? Often the book was written by well known writer in this era. The book untitled Multivariable Calculus, Linear Algebra and Differential Equations is one of several books this everyone read now. This book was inspired a number of people in the world. When you read this book you will enter the new dimension that you ever know ahead of. The author explained their strategy in the simple way, consequently all of people can easily to recognise the core of this reserve. This book will give you a wide range of information about this world now. So you can see the represented of the world in this book.

Sarah Porter:

That guide can make you to feel relax. This particular book Multivariable Calculus, Linear Algebra and Differential Equations was bright colored and of course has pictures on there. As we know that book Multivariable Calculus, Linear Algebra and Differential Equations has many kinds or category. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading which.
