Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series)

Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series)

Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series)

The new series, *International Mathematical Series* founded by Kluwer / Plenum Publishers and the Russian publisher, Tamara Rozhkovskaya is published simultaneously in English and in Russian and starts with two volumes dedicated to the famous Russian mathematician Professor **Olga Aleksandrovna Ladyzhenskaya**, on the occasion of her 80th birthday.

O.A. Ladyzhenskaya graduated from the Moscow State University. But throughout her career she has been closely connected with St. Petersburg where she works at the V.A. Steklov Mathematical Institute of the Russian Academy of Sciences.

Many generations of mathematicians have become familiar with the nonlinear theory of partial differential equations reading the books on quasilinear elliptic and parabolic equations written by O.A. Ladyzhenskaya with V.A. Solonnikov and N.N. Uraltseva.

Her results and methods on the Navier-Stokes equations, and other mathematical problems in the theory of viscous fluids, nonlinear partial differential equations and systems, the regularity theory, some directions of computational analysis are well known. So it is no surprise that these two volumes attracted leading specialists in partial differential equations and mathematical physics from more than 15 countries, who present their new results in the various fields of mathematics in which the results, methods, and ideas of O.A. Ladyzhenskaya played a fundamental role.

Nonlinear Problems in Mathematical Physics and Related Topics *I* presents new results from distinguished specialists in the theory of partial differential equations and analysis. A large part of the material is devoted to the Navier-Stokes equations, which play an important role in the theory of viscous fluids. In particular, the existence of a local strong solution (in the sense of Ladyzhenskaya) to the problem describing some special motion in a Navier-Stokes fluid is established. Ladyzhenskaya's results on axially symmetric solutions to the Navier-Stokes fluid are generalized and solutions with fast decay of nonstationary Navier-Stokes equations in the half-space are stated. Application of the Fourier-analysis to the study of the Stokes wave problem and some interesting properties of the Stokes problem are presented. The nonstationary Stokes problem is also investigated in nonconvex domains and some L_p-estimates for the first-order derivatives of solutions are obtained. New results in the theory of fully nonlinear equations are presented. Some asymptotics are derived for elliptic operators with strongly degenerated symbols. New results are also presented for variational problems connected with phase transitions of means in controllable dynamical systems, nonlocal problems for quasilinear parabolic equations, elliptic variational problems with nonstandard growth, and some sufficient conditions for the regularity of lateral boundary.

Additionally, new results are presented on area formulas, estimates for eigenvalues in the case of the weighted Laplacian on Metric graph, application of the direct Lyapunov method in continuum mechanics, singular perturbation property of capillary surfaces, partially free boundary problem for parametric double integrals.

From reader reviews:

Eric Johnson:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to often the Mall. How about open or even read a book allowed Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series)? Maybe it is to be best activity for you. You know beside you can spend your time together with your favorite's book, you can wiser than before. Do you agree with their opinion or you have different opinion?

Alex Jose:

Book is written, printed, or illustrated for everything. You can understand everything you want by a reserve. Book has a different type. As you may know that book is important factor to bring us around the world. Next to that you can your reading ability was fluently. A guide Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series) will make you to possibly be smarter. You can feel much more confidence if you can know about every little thing. But some of you think that will open or reading some sort of book make you bored. It is far from make you fun. Why they are often thought like that? Have you trying to find best book or ideal book with you?

Vickie Gilbert:

Precisely why? Because this Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series) is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will jolt you with the secret that inside. Reading this book next to it was fantastic author who also write the book in such amazing way makes the content on the inside easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of rewards than the other book get such as help improving your skill and your critical thinking way. So , still want to delay having that book? If I were you I will go to the book store hurriedly.

Verna Krell:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book has been rare? Why so many question for the book? But almost any people feel that they enjoy to get reading. Some people likes reading through, not only science book but also novel and Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series) or perhaps others sources were given know-how for you. After you know how the great a book, you feel need to read more and more. Science guide was created for teacher as well as students especially. Those guides are helping them to add their knowledge. In some other case, beside science publication, any other book likes

Nonlinear Problems in Mathematical Physics and Related Topics I: In Honor of Professor O. A. Ladyzhenskaya (International Mathematical Series) to make your spare time much more colorful. Many types of book like this.
