12 Lead ECG Interpretation in Acute Coronary Syndrome with Case Studies from the Cardiac Catheterization Lab

12 Lead ECG Interpretation in Acute Coronary Syndrome with Case Studies from the Cardiac Catheterization Lab

This 304 page full-color textbook is essentially two volumes in one. The first 92 pages present the basic principles of 12 lead ECG interpretation. The remainder of the book focuses on the evaluation of Acute Coronary Syndrome (ACS) patients. 13 ECG patterns associated with ACS are presented, including the most subtle ECG changes most often missed by clinicians and the ECG machine's automated interpretation software. The curriculum provides an in-depth, balanced approach to patient assessment, combining advanced ECG interpretation skills with patient history, risk factor and cardiac marker evaluation. Correlation of ECG leads with the coronary arterial distributions which commonly supply each region of the heart are reinforced by use of 24 case studies of ST Segment Elevation Myocardial Infarction (STEMI), Non ST Segment Elevation Myocardial Infarction (NSTEMI), Unstable Angina, and Brugada Syndrome. STEMI Case Studies emphasize the ECG identification of the infarct related artery, and complications to be expected based on failure of cardiac structures commonly supplied by the obstructed arterial distribution. Case studies begin with patients' initial assessment data obtained in the emergency department and continue into the cardiac catheterization lab where coronary artery angiography illustrates the location of arterial obstruction. Key learning objectives for each type of Myocardial Infarction (MI) are highlighted. 453 full color images, 135 review questions, and 114 ECGs reinforce the learning process. Target audience is all medical professionals whom are already competent in single-lead rhythm strip evaluation, and desire to become proficient in the 12 lead ECG evaluation of Acute Coronary Syndrome patients. This book was written and reviewed by veteran cardiac cath lab interventionalists. View this book's Table of Contents on the publisher's website: www.TriGenPress.com

From reader reviews:

Mae Bushee:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each guide has different aim or even goal; it means that guide has different type. Some people really feel enjoy to spend their time and energy to read a book. They are reading whatever they have because their hobby is definitely reading a book. Consider the person who don't like studying a book? Sometime, man or woman feel need book if they found difficult problem or exercise. Well, probably you should have this 12 Lead ECG Interpretation in Acute Coronary Syndrome with Case Studies from the Cardiac Catheterization Lab.

Colin Wegner:

Information is provisions for folks to get better life, information nowadays can get by anyone at everywhere. The information can be a expertise or any news even a problem. What people must be consider whenever those information which is inside former life are hard to be find than now could be taking seriously which one works to believe or which one often the resource are convinced. If you find the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take 12 Lead ECG Interpretation in Acute Coronary Syndrome with Case Studies from the Cardiac Catheterization Lab as your daily resource information.

Maria Forshee:

This book untitled 12 Lead ECG Interpretation in Acute Coronary Syndrome with Case Studies from the Cardiac Catheterization Lab to be one of several books in which best seller in this year, this is because when you read this publication you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail outlet or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smart phone. So there is no reason to your account to past this guide from your list.

Stacy Abercrombie:

A lot of book has printed but it is different. You can get it by net on social media. You can choose the most effective book for you, science, comedy, novel, or whatever through searching from it. It is referred to as of book 12 Lead ECG Interpretation in Acute Coronary Syndrome with Case Studies from the Cardiac Catheterization Lab. You can include your knowledge by it. Without departing the printed book, it could add your knowledge and make a person happier to read. It is most significant that, you must aware about book. It can bring you from one place to other place.
