**The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library)** Michael Francis Atiyah, Nigel Hitchin

Systems governed by non-linear differential equations are of fundamental importance in all branches of science, but our understanding of them is still extremely limited. In this book a particular system, describing the interaction of magnetic monopoles, is investigated in detail. The use of new geometrical methods produces a reasonably clear picture of the dynamics for slowly moving monopoles. This picture clarifies the important notion of solitons, which has attracted much attention in recent years. The soliton idea bridges the gap between the concepts of "fields" and "particles," and is here explored in a fully three-dimensional context. While the background and motivation for the work comes from physics, the presentation is mathematical.

This book is interdisciplinary and addresses concerns of theoretical physicists interested in elementary particles or general relativity and mathematicians working in analysis or geometry. The interaction between geometry and physics through non-linear partial differential equations is now at a very exciting stage, and the book is a contribution to this activity.

Originally published in 1988.

The **Princeton Legacy Library** uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

### **From reader reviews:**

#### **Nathan Kelly:**

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite publication and reading a book. Beside you can solve your condition; you can add your knowledge by the book entitled The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library). Try to the actual book The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) as your good friend. It means that it can to get your friend when you truly feel alone and beside associated with course make you smarter than ever before. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know almost everything by the book. So , we should make new experience as well as knowledge with this book.

#### **Eugene Obrien:**

A lot of people always spent their free time to vacation or maybe go to the outside with them family members or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. If you want to try to find a new activity this is look different you can read any book. It is really fun for you personally. If you enjoy the book you read you can spent the whole day to reading a e-book. The book The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) it is quite good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. In case you did not have enough space bringing this book you can buy the actual e-book. You can m0ore simply to read this book out of your smart phone. The price is not too expensive but this book offers high quality.

#### **Rebecca Bailey:**

Many people spending their time frame by playing outside using friends, fun activity using family or just watching TV the whole day. You can have new activity to pay your whole day by reading through a book. Ugh, do you consider reading a book will surely hard because you have to bring the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Cell phone. Like The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) which is having the e-book version. So , why not try out this book? Let's see.

#### **Doris Snell:**

As a university student exactly feel bored in order to reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just very little students that has reading's heart or real their passion. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word

says, many ways to reach Chinese's country. Therefore , this The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) can make you feel more interested to read.
